The Concession Trap

How one panic discount quietly erased $750,000 in building value.

Sarah manages leasing for 200 units in Dallas.

Last month, vacancy moved from 4% to 6%.

Not a disaster. But her boss noticed.

200 units

4% -> 6% vacancy

One email: Fix it.

So she did what pressure makes good operators do.

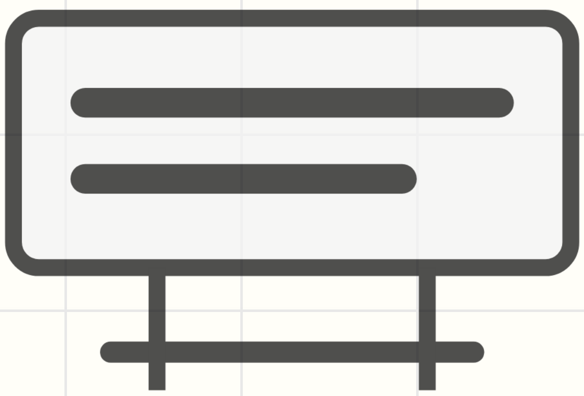
She put a big banner on the website:

ONE MONTH FREE RENT.

8 units filled

2 weeks

Boss happy



Except the math was bleeding underneath.

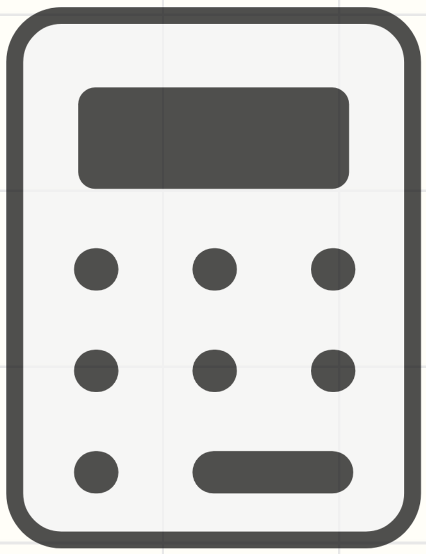
$2,500 x 8 tenants = $20,000 gone.

In two weeks.

5 tenants were going to sign anyway

They needed a $500 nudge

$12,500 unnecessary



Now stretch that panic across a year.

30 turnovers. Same blanket concession.

$75,000 in concessions.
Half unnecessary.
$37,500 wasted.

At a 5% cap rate

$750,000 value erased

Sarah was not bad at her job.

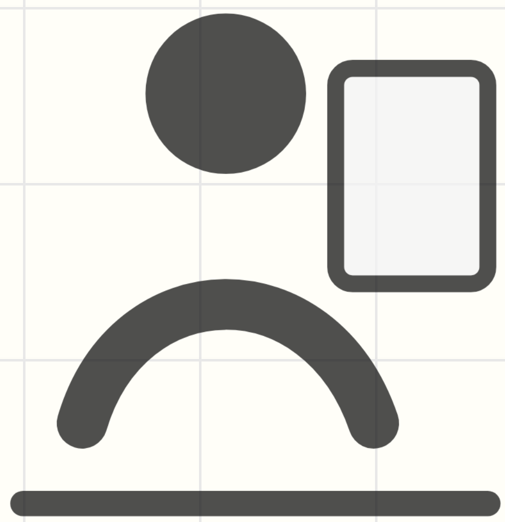
She just did not have the information she needed, when she needed it.

That is the Concession Trap.

No live comp data

No concession comparison

Just fear



Aethera shows the live market before the panic starts.

Your team sees what competitors are actually offering right now.

Not last quarter. Not a rumor.

94% occupancy across the street

$500 move-in credit

Waived app fee closes this
